OBJECTIVE

Driven entry-level developer with a passion for coding and learning. Looking for a position where I can use my web development talents, take on challenges, and support creative thinking in a cooperative team setting.

SKILLS

- Programming Languages: JavaScript (ES6+)
- Frontend: React.js, Redux
- Backend: Node.js, Express.js
- Version Control: Git, Github
- Database Management: MySQL
- Software Tools: Visual Studio Code, Sublime Text

PROJECTS

Social Media Website ([View here](#))

- Developed a comprehensive social media website, including both front-end and back-end components, utilizing ReactJs for the frontend and NodeJs with ExpressJs for the backend.
- Utilized MongoDB as the database system to fetch social media posts efficiently.
- Created a user-friendly app allowing users to engage with content through features like liking posts and building connections by adding friends.

E-commerce Website App ([View Here](#))

- Developed a robust e-commerce website leveraging all aspects of front-end and back-end functionalities.
- Integrated shopping cart functionalities to facilitate seamless shopping experience using React.js.
- Utilized MongoDB for database services and real-time data synchronization.

Portfolio Website ([View Here](#))

- Created an engaging and visually appealing portfolio website, utilizing modern technologies such as HTML5, CSS3 and ReactJs
- Implemented responsive web design techniques to ensure seamless accessibility across all devices and screen sizes
- Incorporated animations to enhance user engagement and create a dynamic website by using framer motion.
